- HDMI/VGA local monitor support
- P2P service (QR code connect)
- Web GUI/interface for access to live or past recordings and settings

### PACKAGE INCLUDES

- Four dome cameras
- 2TB hard disk drive (HDD)

### ARE YOU AN EASY TARGET?

Dental offices have expensive equipment, supplies and even drugs with possible street value, which can make them a target for thieves. Attacks may unfortunately come from external as well as internal sources, resulting in vandalism or stolen data, property and equipment.

### THWART INTERNAL AND EXTERNAL THREATS

You've worked hard to build your practice, and the last thing you want to worry about is losing it all to one of these threats. Surveillance systems can help foster employee accountability and thwart would-be invaders, with even the presence of cameras a deterrent to undesirable activity. If the worst were to happen, footage recorded by surveillance cameras in your practice can provide evidence, assisting in the identification of perpetrators so they can be brought to justice. TechCentral surveillance gives you peace of mind from knowing the practice you've built has extra eyes watching over it day and night.

To learn how to better protect your practice with TechCentral Surveillance

“Not every threat to your practice is online. With TechCentral Surveillance you can add an additional layer of protection to everything you’ve worked so hard to build.”

~ Howard Grainger, Product Manager,  
*Henry Schein TechCentral*

## PEACE OF MIND

### DISCOURAGE THIEVES

No one wants to think they could be a victim, but sadly, bad guys exist. Thieves seeking an easy target. Vandals looking to randomly destruct. Dishonest patients. Disgruntled or even just lazy employees. TechCentral video surveillance can help discourage those who might otherwise take advantage of your dental practice by stealing or damaging equipment, supplies or money.

TechCentral will install strategically located video surveillance cameras in your practice that can help identify a perpetrator in the event of a break-in, theft, violence or damage to equipment. Beyond protecting against external threats, video footage can also help provide insight into how staff members perform their duties. With TechCentral Surveillance, you may prevent inappropriate patient and employee behavior from happening in the first place, as well as help you defend yourself against potential unsubstantiated claims and lawsuits.

## KEY FEATURES

### HELP REDUCE RISK OF THEFT OR VANDALISM

TechCentral Video Surveillance systems and the accompanying signage can help deter internal and external threats.

### BETTER IDENTIFY PERPETRATORS

Law enforcement and insurance companies may be able to use your video footage as evidence, helping to mitigating physical and financial harm to your practice.

### MONITOR ACTIVITY

TechCentral cameras in the dental office can help you protect your assets as well as your employees, along with potentially increasing staff efficiency.
